Naimatul Ulumiyah

AI Engineer | Certified Associate Data Scientist | Generative AI &
LLM Enthusiast
Indonesia

Ringkasan

I am an Information Systems student and a certified Associate Data Scientist with hands-on experience building AI-powered products, multi-agent architectures, and data-driven solutions. Currently deepening my AI engineering tools through IBM SkillsBuild. Proficient in Python, LangGraph, ChromaDB, and ConvNeXt, as well as optimizing workflows through Business Process Management (BPMN). I bridge the gap between business processes and production-grade AI models to solve complex real-world problems.

Pengalaman

Pijak in collaboration with IBM SkillsBuild
Pijak in Collaboration x IBM Cohort
Februari 2026 - Present (4 bulan)

- Leading AI engineering for Matcha, an adaptive career assistant built on a multi-agent LangGraph architecture with intent drift detection, vector-based skill gap analysis (ChromaDB), and an anti-overwhelm dashboard designed to help Indonesian job seekers navigate career transitions.
- Developing deep expertise in Machine Learning, Deep Learning, and AI application development through the official IBM curriculum.
- Tech Stack: Python, LangGraph, ChromaDB, Streamlit, SQLite.

Universitas Pembangunan Nasional Veteran Yogyakarta
10 bulan

Assistant Laboratory Coordinator in Business Process Management
Februari 2026 - Present (4 bulan)

Research Assistant

September 2025 - Present (9 bulan)

- Processed and analyzed complex datasets for the joint research project between PSKEUIN x Bank Indonesia, focusing on end-to-end data pipeline and interactive dashboard development.

- Developed advanced machine learning models for HAES Lab research in close collaboration with university faculty members.
- Conducted social media scraping, data preprocessing, and successfully authored a journal paper focused on Sentiment Analysis research.

Laboratory Assistant in a Design and Management of Computer Network Laboratory
