PROFILE

Information Systems student (GPA 3.90/4.00) with hands-on experience building AI-powered products, mobile applications, and data-driven solutions. Certified Associate Data Scientist and Junior Mobile Programmer (BNSP), currently deepening AI engineering skills through IBM SkillsBuild. Passionate about human-centered technology from designing intuitive UX to deploying machine learning models that solve real problems.

TECHNICAL SKILLS

- Mobile & Web: Flutter, Dart, Laravel, HTML, CSS, Tailwind
- AI/ML: Python, TensorFlow/Keras, Scikit-learn, ConvNeXt, NLP
- Data & Analytics: SQL, R, Tableau, Looker Studio, Power Pivot
- Design: Figma, Canva, Krita
- Tools: GitHub, Kaggle, Notion

EDUCATION

Universitas Pembangunan Nasional "Veteran" Yogyakarta*2023-Present*

Bachelor of Information Systems | GPA: 3.90 / 4.00

- Glow and Lovely Bintang Beasiswa Awardee (Batch 7)
- Research Assistant - Machine Learning (HAES Lab)
- Research Assistant - PSKEUIN x Bank Indonesia
- Research Assistant - Sentiment Analysis
- Teaching Assistant - English & Business Process Management
- Teaching Assistant - IT Investment Management
- Laboratory Assistant - Database Management System, Computer Network, Web Programming, Business Process Management (200+ students)

EXPERIENCE

IBM AI Engineer - Pijak x IBM SkillsBuild (Studi Independen)*February 2026 - Present*

- Leading AI engineering for Matcha, an adaptive career assistant built on a multi-agent LangGraph architecture with intent drift detection, vector-based skill gap analysis (ChromaDB), and an anti-overwhelm dashboard. Designed to help Indonesian job seekers navigate career transitions.
- Developing expertise in ML, Deep Learning, and AI application development through IBM curriculum.

Laboratory Coordinator & Teaching Assistant - UPN "Veteran" Yogyakarta*2024 - Present*

- Coordinated Business Process Management laboratory for 100+ students.
- Served as Laboratory Assistant for Database Management, Computer Network, and Web Programming labs (200+ students across 4 subjects).
- Served as Teaching Assistant for English course, Business Process Management, and IT Investment Management courses.
- Contributed to Information Systems Major Accreditation team.

Research Assistant - UPN "Veteran" Yogyakarta*2025 - Present*

- Processed and analyzed data for PSKEUIN x Bank Indonesia research, focusing on data pipeline and dashboard development.
- Developed machine learning models for HAES Lab research in collaboration with faculty.
- Conducted social media scraping and authored journal paper for Sentiment Analysis research.

PROJECTS

Matcha - AI Career Assistant (Lead AI Engineer)

- Leading AI engineering for an adaptive career assistant built on multi-agent LangGraph architecture with intent drift detection, vector-based skill gap analysis (ChromaDB), and an anti-overwhelm dashboard. Designed to help Indonesian job seekers navigate career transitions.
- Stack: Python, LangGraph, ChromaDB, Streamlit, SQLite

ARAH - AI-Powered Career Gap Analyzer

- Built a multi-agent AI platform (LangGraph + FastAPI + React) that analyzes skill gaps between students' academic profiles and target careers, using a database of 188 job postings and 349 course catalogs to generate personalized learning roadmaps.

VSF - Volunteer Spot Finder

- Built an Android mobile app (Flutter, Dart, Hive, Supabase) connecting volunteers with organizations across Indonesia. Featuring dual-role access, event discovery, map integration, and real-time registration.

GreenOS - UI/UX Design

- Designed a precision farming mobile app UI integrating IoT sensor data and AI-driven recommendations (fertilizer, pest detection, crop health scoring) with accessibility-first approach for senior farmers using traffic-light NPK indicators and single health score system.

Re-box - UI/UX Design

- Designed UI/UX for an e-waste pickup and rewards app addressing low public awareness of electronic waste disposal in Indonesia. Featuring pickup scheduling, drop-off point mapping, and a gamified reward system to incentivize responsible e-waste behavior.

CERTIFICATIONS

- Associate Data Scientist - BNSP (2025)
- Junior Mobile Programmer - BNSP (2025)
- Data Analyst with Python - IBM / Sololearn (2025)
- SQL and Relational Databases - IBM / Sololearn (2025)

OTHER PROJECTS

- Face Anti-Spoofing using ConvNeXt architecture (97% accuracy)
- Marketing Analysis: customer behavior prediction using Random Forest Classifier (Python) - Independent project
- CO2 Emission Trajectory Modeling Indonesia 2045: Geospatial-Financial Nexus (Python) - Team competition
- AI for Road Safety: Accident Hotspot Detection via Social Media (Python) - Team competition
- Data Visualization: Covid-19, Data Scientist Salary (Excel, R, SQL, Tableau)
- Data Penjualan Kimia Farma (Excel, Google Data Studio)
- Web Projects: "Tsunami" and "Aloutdor"

OTHER ACTIVITIES

- Speaker, Glow and Lovely Bintang Beasiswa Socialization (Batch 8 & 9)
- Coordinator of Publication & Documentation, BEM FTI Writing Bootcamp
- Staff of Media, Communication & Information, Himasisfo UPNVY
- Brand Ambassador, Pertemanan Sejiwa (Batch 3)
- Master of Ceremony (11 events: seminars, webinars, academic socials)
